EDUCATION

Diploma in computer Application

Golden Computer Education | Ropar

05/2022

Diploma Electrical Engineering

IET Bhaddal College

WORK EXPERIENCE

Reactjs Developer

Code Adda Pvt.Ltd.

08/2024 - 01/2025

Achievements/Tasks

- Developed foundational ReactJS components by accurately translating high-fidelity HTML/CSS designs, ensuring pixel-perfect UI implementation.
- **Implemented** robust user authentication and authorization (Sign-up/Login) using **JSON Web Tokens (JWT)**, securing API routes and user sessions.
- Engineered a dedicated Admin Panel interface, allowing administrators full CRUD (Create, Read, Update, Delete) capabilities for event management.
- **Integrated** and consumed several **RESTful APIs** to fetch and dynamically display real-time city event data on the front-end interface.

PERSONAL PROJECTS

Apna Restaurant: Ordering & Reservation Platform

- **Global State Management:** Implemented Redux Toolkit to manage the persistent shopping cart state, allowing users to add, remove, and update quantities with real-time total price calculation.
- **Responsive UI & Styling:** Built a completely responsive Single Page Application (SPA) using ReactJS and Tailwind CSS, ensuring a modern, mobile-first design across all devices.
- **Form & Validation:** Developed a fully functional Table Booking Modal with client-side input validation and user feedback managed via React Hooks and react-toastify.
- **Routing & Architecture:** Leveraged React Router DOM for efficient component-based routing and a seamless user experience.
- **Live Demo:** <https://apna-restaurant.netlify.app/>
- **GitHub Repo:** <https://github.com/Gurvinder-singh12/restaurant-website>

Professional Developer Portfolio

- **Front-end Architecture:** Designed and developed a professional, responsive Single Page Application (SPA) using ReactJS and Tailwind CSS to consolidate and showcase personal projects and technical expertise.
- **Deployment:** Managed full deployment pipeline using Git/GitHub for version control and automatically deployed the application via Netlify.
- **Performance Optimization:** Focused on clean, modular component design and optimized assets for fast loading speed and high performance metrics.
- **UI/UX:** Created a clean, aesthetically pleasing, and intuitive user interface to enhance visitor engagement and project accessibility.
